DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3, 4 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 8-9, recites the limitation "the reduced contact clamping". There is insufficient antecedent basis for this limitation in the claim.

Claim 3, lines 3-4, recites the limitation "the presented component profile". There is insufficient antecedent basis for this limitation in the claim.

Claim 4, lines 3-4, recites the limitation "the mounting arrangement". There is insufficient antecedent basis for this limitation in the claim.

Claim 12, it is not clear what Applicant means by "more resilient clamping", line 4, and "more accurate machining", line 5. It is not clear what the resilient clamping and accurate machining is "more" than.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No.

4,964,766 (Turchan et al., hereafter '766).

'766 teaches three clamp pairs with clamping and seating pads on either side of the

workpiece 2 (see figure 14, for example); push clamps 25, 26 opposite locating pins 22, 21,

dampening device 23, 24, movable locating pin structure 27 with hydraulic cylinder 40 and

rubber support pin 32 (see col. 5, line 42 through col. 7, line 23 and figures 2 and 14 for

example); wedge lock clamp 6 (see figure 9A, for example) that clamps and dampens vibration

along the z-axis (col. 3, lines 63-64, for example).

'766 teaches a machining process, specifically a face mill 37.

Regarding claim 12, Examiner notes that a workpiece starts off in a "rough" condition

before machining with an initial machining process for removal of bulk material. The removal of

material is the process of machining. The machining process includes an initial rough machining

process with the tool starting the machining operation and a final machining process where the

details are machined. Furthermore, the machining process includes these steps when the

workpiece is forwarded to another machining process where the workpiece is again in a rough

initial state for rough machining then is machined to a final machining state. '766 specifically

Art Unit: 3722

teaches the clamping of the workpiece for accurate machining (see col. 7, lines 7-34, for example).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dana Ross whose telephone number is 571-272-4480. The examiner can normally be reached on Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
